**Abstract.** India's status as the largest democracy in the world and a country that values peace shapes its strategic role in international affairs. India has embraced democracy and non-violence despite its colonial background, and it actively promotes world peace through its participation in institutions like the UN, SAARC, and ASEAN. But India's foreign policy approaches, especially when it comes to dealing with global concerns like economic growth and terrorism, show weaknesses in striking a balance between regional leadership and wider global influence. This article examines India's foreign policy by examining its peacekeeping missions and international affiliations. The results indicate that India remains a significant player in promoting stability and peace in the world because of its dedication to democratic principles and non-violence, which serves as a model for other developing countries.

**Key words:** democracy, international, level, government, prestige

---

## Introduction

India is maintain its own strategy in international level to protect its interest in international level. Basically India is a peace loving country and wants to maintains its friendly relations with other countries. At the same time, India is protecting its image in international level.

India is an Asian country and at the same time, it maintains its friendly ties with the nations of other continent nations. There are many measurements which measures the prestige of India in international level.

## Material and Methods

### Objectives

The objectives in this concept can be as follows:

- a) The main objective of this review article is to study the status of India at international level in many concepts.
- b) Studying the international relations of India in another point of view.
- c) Studying the level of India in the international level.
- d) Analyzing the problems in framing India's foreign policy.
- e) Seeing in the other points of view like curbing terrorism, smuggling and seeing in the peaceful point of view.
- f) Studying about the existence and role of U.N.O, commonwealth group of nations, ASEAN etc.

In methodology we can study the international levels. In this methodology, we are studying about the India's international relations with various aspects also. In this concept, India is maintaining the international relations and the level of India in the international level also as a peaceful loving country, India is having its own strategies in framing the foreign policy and it had its own policies to make its room in international level also.

As a developing country, India is having its own policies to make economic development, like five-year plans and it is having its own methods to follow its own achievement also.

As a group of this world it opposes the communalism, economic imperialism and encourages the nations to get freedom because it had suffered the under British rule for more than 200 years.

It encouraged the other countries to get freedom and walk in the way of progress.

As a peace-loving country it opposed the cold war, nuclear bomb storage and encouraged the disarmament. It strongly proposed the using the nuclear weapons for the peaceful purposes.

India in international associations; India had its active role in international associations.

ASEAN; India is an actively participator in the activities of SEAM. As am come from Asians continent, India is supporting the activities of ASEAN group. Our players are also participate in ASEAN fames like Olympic games and India had win the many medals.

Commonwealth group of Nations; Common wealth group of nations was started by European continent nations and the nations which were ruled by the British crown were made a group that is called as Commonwealth group of nations. The Brutish crown is the nominal head and India which were under British rule is also a member nation of Commonwealth group of nations every four years, the commonwealth fames were held and UN Indian players are getting medals in commonwealth games.

SAARC group of nations; The South Asians group of nations was formed in 1985 and India is an active member of SAARV group of nations. As an active member nation India is always supports the activities of SAARC. Even the SAARC summit conference was held in India and India id always supporting the goals of SAARC.

## Results and Discussion

In this concept we had analyzed the concept of the present position of India in international level. India as a second biggest democratic nation in the world, it had adopted the democrat values and always uphold the values of democracy in the world. The best example in the conducting of elections in India for every 5 years and the whole world is observing the election process in India. The main theme is that even an illiterate person in India is voting the election and choosing the representatives. Most of the time the voters in India had given shocking result to the medias that he had chosen different types of elected representatives. Most of the time it seems as the beastliness' of democracy.

Importance of studying the role of India in the international level; By studying the position if India in the international level, we can gain a vast knowledge about the international relations in the world.

By studying about India, we are having the experience that er are not studying about one nation in the world we are studying about sub-content in the world.

India is considered as a vishwa –guru because it is having the rich culture and rich heritage. It is having civilizations even in the vedic age also. So by studying India we are having feeling studying the rich heritage.

As a leader of third world nations as well as a founder of non-aligned movement, it had contributed to international peace also. Being the leader of non-aligned movement, it had also maintained the friendly ties with American block as well as Russian block also.

As a peace-loving country, India is continuously opposing the using of nuclear weapons for storage purpose and India is using the nuclear energy for peaceful purpose. By this it is becoming the model for the other nations and a good example to follow.

Due to suffering under British role for, more than 200 years, India is strongly opposing the colonialism and imperialism and supporting other nations to become independent and a good friend to newly independent nations.

As a strong supporter of U.N.O, India is whole heartily supporting the goals, purposes and programmes of U.N.O. and by this it is supporting the U.N.O to maintain the international peace and to achieve the welfare of human kind.

Very good feeling about to study about India.

## Conclusion

Totally we can say that India is having its own place in the international level by contributing to international peace in the world.

As a peace-loving country, it contributed to international peace and maintains prestige and good name and fame in the international level.

By studying about India we can have a beautiful experience, as well and find the valuable information about International relations.

Jai Hind.
